The Period for Re	e MAILING DATE of this communic ply	ation appears on t	the cover sheet with the c	orrespondence ad	ldress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1)⊠ Res _i	ponsive to communication(s) filed	on 28 January 2	005.		ļ			
<u> </u>	This action is FINAL . 2b) This action is non-final.							
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3629

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/28/05 has been entered.

- 2. The examiner will address applicant's remarks at the end of this office action. Currently claims 1,2,4-17 are pending.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1,2,4-17, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ouimet (WO 97/37328) in view of Zeitman WO 98/04080).

For claims 1,2,4,5,9,10,12,14,15,17, Ouimet discloses a method of managing the parking of vehicles. Ouimet discloses that the user of a parking space enters information concerning the parking of their vehicle (i.e. vehicle location information and parking time information) into a ticket machine 12. That information is sent to a central computer system (server) 16 and to mobile units 18. The fee for parking is determined based on the location and time information. A debit card or credit card can be used to pay the parking fee. With respect to the recitation of the ticket machine supplying

Art Unit: 3629

"parking authorization control elements" upon request by a monitoring agent, this is interpreted to be the continuous transmission of parking data from the ticket machine to the server and mobile units. The monitoring agent is interpreted to be the software/hardware responsible for detecting a new purchase for parking, and for requesting/instructing that the data is sent out from the ticket machine to the server and mobile units. Not disclosed is that the user can send parking information to the server by mobile telephone and that the server would then send the parking information to the ticket machine. Zeitman discloses a parking management system that has a high level of user convenience. Zeitman discloses that the user can directly communicate with a central computer system (server system) by using their mobile telephone and can provide the information such as vehicle space and time information by using their telephone. This would allow for more user convenience with respect to adding another way for the user to conduct the parking space use transaction. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Ouimet with the ability to take user information by telephone as is disclosed by Zeitman. The user could then communicate with the server 16 directly by telephone and then the server would update the payment terminals and mobile units with new information.

With respect to claims 6,7,8, the location of the parking space can be a number, which satisfies what is claimed. It does not matter if the number is a space number, a vehicle number, etc.. A number is a number and the prior art discloses the taking of a number.

For claim 11, the authorization control element supplied by the ticket machine is a list of information as claimed.

For claim 13, the "electronic certificate" is considered to be any data sent from the server to the phone during the parking use transaction. This could be a receipt in electronic form or any other data sent to the phone. The term "electronic certificate" is very broad language and can be almost anything.

With respect to claim 16, the account of the user (debit card account) is fully capable of being recharged by a prepaid scratchable card. A user can purchase a lottery ticket (with scratchable areas to show what you won if anything) and if they win any amount of money, that money could be deposited into the debit card account. The prior art is fully capable of what is claimed.

5. Applicant's arguments filed 1/28/05 have been fully considered but they are not persuasive. Applicant has argued that the continuous transmission of data that occurs behind the scenes in Ouimet does not satisfy the limitation in claim 1 of "upon request of a monitoring agent". Applicant has stated that with respect to Ouimet "Because the information is continuously broadcast, it is not necessary for a monitoring agent to request the information.". When the parking payment system of Ouimet was initially installed or put into use, a standing request (initial request) had to have been put into the system/software so that the system knows to continuously transmit data. The system of Ouimet contains a standing request for data so that when a ticket machine is

Application/Control Number: 09/936,688

Art Unit: 3629

used to pay for parking, that data is automatically sent out over the network without

having to be requested a 2nd time. The argument is found to be non-persuasive.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dennis Ruhl whose telephone number is 703-308-2262

or 571-272-6808 (effective 4/13/05). The examiner can normally be reached on

Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John Weiss can be reached on 703-308-2702 or 571-272-6812 (effective

4/13/05). The fax phone number for the organization where this application or

proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
